V1.0	Not applicable	Not applicable

The Forest Stewardship Council® (FSC) is an independent, not for profit, non-government organization established to support environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

FSC's vision is that the world's forests meet the social, ecological, and economic rights and needs of the present generation without compromising those of future generations.

You may not distribute, modify, transmit, reuse, reproduce, re-post or use the copyrighted materials from this document for public or commercial purposes, without the express written consent of the publisher. You are hereby authorized to view, download, print and distribute individual pages from this document subject for informational purposes only.

FOREWORD

FSC received various comments from certification bodies and stakeholders requesting a reduction in the number of normative documents to make the documented certification system more comprehensible. FSC therefore combined all previous Advice Notes into single documents which are called “Directive”. A directive includes all advices issued in relation to a single Standard or Procedure. The relation to the respective normative document is reflected in the document code of the Directive. Where new advice is approved, these will be added to the directive and the revised document will be reissued.

The intention of this document is to standardize understanding and implementation of requirements by FSC accredited certification bodies and certificate holders.

This document will be revised as required. The content of a directive will be incorporated into the related standard in the revision process as feasible.

Changes and amendments to the directive will be announced to the FSC Network and FSC accredited certification bodies immediately.

Note on use of this directive:

This Directive includes the official versions of FSC Advice Notes approved by FSC International, and it is available at connect.fsc.org. Any translation of this Directive or individual Advices Notes is not an official translation approved by FSC International. If there is any conflict or inconsistency between the approved English version and any translated version, the English version shall prevail.

All aspects of this document are considered to be normative, including the scope, effective date, references, terms and definitions, tables and annexes, unless otherwise stated.

A. SCOPE

This document provides FSC's errata and addenda of the requirements included in applicable versions of FSC-STD-60-006 and FSC-PRO-60-006.

B. REFERENCES

The following referenced documents are indispensable for the application of this document. For undated references, the latest edition of the referenced document (including any amendments) applies.

FSC-STD-01-001	FSC Principles and Criteria for Forest Stewardship
FSC-STD-60-004	International Generic Indicators
FSC-STD-60-006	Process Requirements for the Development and Maintenance of National Forest Stewardship Standards
FSC-PRO-60-006	Development and Transfer of National Forest Stewardship Standards to the FSC Principles and Criteria Version 5-1
FSC-PRO-60-006b	FSC Risk Assessment Framework
FSC-PRO-60-007	Structure, Content and Development of Interim National Standards

C. FSC NORMATIVE DOCUMENTS REPLACED BY THIS DIRECTIVE

1. **FSC-ADV-60-006-01** *Advice Note on Incorporation of new International Generic Indicators introduced with FSC-STD-60-004 V2-0 into National Forest Stewardship Standards*
2. **FSC-ADV-60-006-02** *Advice Note on incorporation of new or revised International Generic Indicators, introduced in future versions of FSC-STD-60-004 into National Standard (National Forest Stewardship Standard and Interim National Standard)*
3. **FSC-ADV-60-006-03** *Advice Note on cut-off date for transfer of national standards (National Forest Stewardship Standards, Regional Forest Stewardship Standards and CB Standards) from P&C V4 to P&C V 5-2 (or higher).*
4. **FSC-ADV-60-006-04** *Advice Note on the use of FSC-PRO-60-006 V2-0 for the revision of an existing P&C V5-X NFSS.*

D. TERMS AND DEFINITIONS

Terms and definitions are provided in *FSC-STD-01-002* and in *FSC-STD-60-006*. Further advice-related definitions may be provided in the context of each advice.

PART 1 GENERAL ISSUES

- 1 The FSC Directive is providing FSC accredited certification bodies (certification bodies) and other stakeholders with clear advice on the implementation of FSC's international policies and standards. A directive is designed to provide formal advice in relation to a single specific issue or question raised with the FSC International Centre. All advice on a series of issues related to a specific FSC international policy or standard are collected in one document to improve accessibility for certification bodies, certificate holders and interested parties.
- 2 If a certification body is in doubt about the correct implementation of an FSC policy or standard, the certification body shall request clarification from the FSC Performance and Standards Unit. If required, such clarification will be provided in the form of a new advice or interpretation.
- 3 Prior to the finalization of an advice, a certification body may make its own decision in relation to a question for which clarification has been sought. In such a case, responsibility for the consequences of the decision shall rest exclusively with the certification body concerned. Formal advice subsequently provided by the FSC International Centre will be applicable retrospectively.
- 4 The advice provided in this document represent the formal position of the FSC International Centre unless and until it is superseded by the approval of a more recent policy, standard, or advice. In such cases the requirements specified in the more recent document shall take precedence.
- 5 Certification bodies are required to conform with the most recent formal advices, and ASI will base its assessments and issue of corrective actions on these.
- 6 Finalized advices are approved by the Policy and Performance Director or the FSC Director General. If a certification body wishes to contest the advice provided it may do so by requesting a formal review and decision by the FSC Policy and Standards Committee. Until and unless such a review and decision has been finalised, the certification body shall continue to comply with the position of the FSC International Centre.
- 7 Advices are under continual review and may be revised or withdrawn in response to new information, experience or changing circumstances, for example by the development of new policies or standards approved by the FSC Board of Directors.

PART 2 FSC ADVICES ON FSC-STD-60-006

ADV-STD-60-006_01 Advice Note on Incorporation of new International Generic Indicators introduced with FSC-STD-60-004 V2-0 into National Forest Stewardship Standards	
Normative reference	FSC-STD-60-004 V2-0 International Generic Indicators, Section C.
Scope	This Advice Note applies to Standard Development Groups whose National Forest Stewardship Standards were approved or passed the stage of second public consultation before 1st July 2018, when FSC-STD-60-004 V2-0 was published (see Annex 2).
Approval date	20 August 2020 by FSC Director General
Publication date	28 August 2020
Status	Final
Effective date	As of the approval date (20 August 2020)
Background	At their 68th meeting in March 2015, the FSC Board of Directors approved the first version of the FSC-STD-60-004 <i>International Generic Indicators</i> (IGI), as the starting point for developing National Standards. In June 2018, the Board approved a second version of this document introducing the changes described in FSC-STD-60-004 V2-0 <i>International Generic Indicators</i>, Section E Preamble. The FSC Board of Directors decided that: ○ Standard Development Groups shall incorporate all new or revised IGI from this version (V2-0) (see Annex 1) into their National Standards under development, in cases where the second consultation has not yet started. ○ Standard Development Groups, whose National Standards have passed the stage of second consultation, or have already been approved (see Annex 2), shall incorporate all new or revised IGI from this version (V2-0) into their National Standards within 24 months of the effective date of V2-0 (being this deadline 30 June 2020). Since then, different groups of stakeholders have raised concerns regarding the additional work outside the normal cycle of review and revision of the standards, stakeholder fatigue, the challenge to reunite Standard Development Groups (often dissolved once the standard development is completed), cost implications, creation of bottlenecks in the standard assessment and decision making process, etc. This Advice Note formally implements the decision made by the FSC Board in January 2020 to address these concerns and to streamline and facilitate the transfer of IGIs V2-0 to National Forest Stewardship Standards.
Advice	Standard Development Groups, whose National Forest Stewardship Standards passed the stage of second public consultation or were approved before 01 July 2018 shall:

	1. incorporate the new and revised indicators introduced with FSC-STD-60-004 <i>International Generic Indicators</i> V2-0 the latest at the next scheduled revision of their National Forest Stewardship Standard, and 2. submit a final draft for decision making to the FSC secretariat within five (5) years of the effective date of their national standard developed according to IGI V1-0.																					
Annexes	Annex 1. Changes to the IGI from V1-0 to V2-0 New and revised IGIs incorporated to IGI V2-0 were result of the: 1. Incorporation of content from the ‘FSC Report on generic criteria and indicators based on ILO Core Conventions principles’, approved by the FSC Board of Directors in August 2017. 2. Incorporation of the IFL IGI, developed by the High Conservation Values Technical Working Group, approved by the FSC Board of Directors in October 2017. 3. Incorporation of Motion 40:2017 on FPIC, approved by the FSC General Assembly in October 2017. 4. Alignment of Transaction Verification requirements with FSC-STD-40-004 V3-0, Clause 1.7 and Advice 40-004-14. Further references, terms and definitions were incorporated in relation to the changes listed above. Annex 2. Countries to which this Advice Note applies <table><tr><td></td><td>Completed second consultation before 01 July 2018</td><td>Approved before 01 July 2018</td></tr><tr><td>Africa</td><td></td><td>South Africa, Tanzania, Uganda</td></tr><tr><td>Asia Pacific</td><td>Malaysia, New Zealand, Taiwan, Vietnam</td><td>Australia, China</td></tr><tr><td>Commonwealth of Independent States (CIS)</td><td>Russia, Ukraine</td><td>Nepal, Papua New Guinea</td></tr><tr><td>Europe</td><td>Bosnia and Herzegovina, Luxembourg, The Netherlands, Spain, Switzerland</td><td>Bulgaria, Denmark, France, Germany, Italy, Portugal, Romania, United Kingdom</td></tr><tr><td>South and Central America</td><td>Uruguay</td><td></td></tr><tr><td>North America</td><td>Canada</td><td></td></tr></table>		Completed second consultation before 01 July 2018	Approved before 01 July 2018	Africa		South Africa, Tanzania, Uganda	Asia Pacific	Malaysia, New Zealand, Taiwan, Vietnam	Australia, China	Commonwealth of Independent States (CIS)	Russia, Ukraine	Nepal, Papua New Guinea	Europe	Bosnia and Herzegovina, Luxembourg, The Netherlands, Spain, Switzerland	Bulgaria, Denmark, France, Germany, Italy, Portugal, Romania, United Kingdom	South and Central America	Uruguay		North America	Canada

ADV-STD-60-006_02 Advice Note on incorporation of new or revised International Generic Indicators, introduced in future versions of FSC-STD-60-004 into National Standard (National Forest Stewardship Standard and Interim National Standard)	
Normative reference	FSC-STD-60-004 V2-0 International Generic Indicators, Section C.
Scope	This Advice Note applies to Standard Developers whose National and Regional Forest Stewardship Standards are not based on the latest version of IGI.
Approval date	16 December 2021 by FSC Director General
Publication date	11 January 2022
Status	Final
Effective date	As of the approval date (16 December 2021)
Period of validity	Until withdrawn or replaced by other normative documents.
Background	At their 68th meeting in March 2015, the FSC Board of Directors approved the first version of the FSC-STD-60-004 <i>International Generic Indicators</i> (IGI), as the starting point for developing National Forest Stewardship Standards. In June 2018, the Board approved a second version of this document introducing the changes described in FSC-STD-60-004 V2-0 <i>International Generic Indicators</i>, Section E Preamble. The Board also decided that Standard Development Groups (SDGs) shall incorporate all new or revised IGI into their National Standards undergoing development process by 30th June 2020. After this, different groups of stakeholders have raised concerns regarding the additional work outside the normal review and revision cycle of the standards, stakeholder fatigue, the challenge to reunite Standard Development Groups (often dissolved once the standard is completed), cost implications, creation of bottlenecks in the standard assessment and decision-making process, etc. In January 2020, another decision was made by the FSC Board to address these concerns and to streamline and facilitate the incorporation of IGIs V2-0 into National Forest Stewardship Standard. The Board decided that SDGs shall incorporate revised indicators in the next scheduled revision of the national standards and shall submit the final draft for decision making to the FSC Secretariat within 5 years of the effective date of the national standards developed based on IGI V1-0. However, in March 2021 the Board decided that new and revised IGIs (e.g., IGIs resulting from the revised Pesticides Policy) shall be incorporated into national standards no later than in the next scheduled review and revision of the national standard. This Advice Note formally implements the decision made by the FSC Board in March 2021.
Advice	Changes to the IGIs in FSC-STD-60-004 shall be addressed in national standards (National Forest Stewardship Standards and Interim National Standards) as follows: a) For national standards which are in development or revision at the time of the approval of a new version of FSC-STD-60-004 and are at a stage

	prior to the launch of the first consultation, changes to the IGI shall be addressed within the ongoing development or revision process. b) For national standards which are not in development or revision at the time of the approval of a new version of FSC-STD-60-004 or have passed the launch of the first consultation in an ongoing development or revision process, changes to the IGI shall be addressed no later than in the next scheduled regular review and revision of those standards.
--	---

ADV-STD-60-006_03 Advice Note on cut-off date for transfer of national standards (National Forest Stewardship Standards, Regional Forest Stewardship Standards and CB Standards) from P&C V4 to P&C V 5-2 (or higher).	
Normative reference	FSC-STD-01-001 V5-2 Principles and Criteria for Forest Stewardship FSC-STD-60-006 V2-0 International Generic Indicators
Scope	This Advice Note applies to national standards which are based on P&C V4 and have not been transferred to P&C V 5-2 (or higher).
Approval date	16 December 2021 by FSC Director General
Publication date	11 January 2022
Status	Final
Effective date	As of the approval date (16 December 2021)
Period of validity	Until 31st December 2024 or until replaced by other normative documents..
Background	As per the requirements of FSC-STD-60-006 and FSC-PRO-60-007, the national standards are required to develop indicators based on latest P&C version. However even after rolling out P&C V5 in 2012, there are still significant number of national standards that are not yet transferred to P&C V5-2, either because the process was never registered, or the registered process failed before the completion of the process. Hence, the requirement to enter a transfer process has not been fully implemented. Additionally, FSC does not had an expiry date for CB standards operating based on P&C V4. As a result, in its 87th meeting, the FSC Board established a cut-off date for national standard based on P&C V4 to transfer all the existing national standards to the latest P&C V5-2 and mitigate any potential credibility risk for FSC. This Advice Note formally implements the decision made by the FSC Board in March 2021.
Advice	A national standard (National Forest Stewardship Standards, Regional Forest Stewardship Standard or CB standard) which is based on P&C V4 will be considered invalid by FSC if it is not going to be replaced by a revised version based on P&C V5-2 (or higher) that: a) is submitted to PSU for final review by 31 January 2024; and b) is approved by PSC or the PSG by 31 December 2024. Expiry dates will be announced well in advance to affected certification bodies and certificate holders.

ADV-STD-60-006_04 Advice Note on the use of FSC-PRO-60-006 V2-0 for the revision of an existing P&C V5-X NFSS.	
Normative reference	FSC-PRO-60-006 V2-0 <i>Development and Transfer of National Forest Stewardship Standards to the FSC principles and criteria version 5-1</i> , E. Terms and Definitions 1. General requirements, 2. Using the IGIs and 5. Addressing Scale, Intensity and Risk (SIR).
Scope	Countries where P&C V5-x based National Forest Stewardship Standard is due for revision.
Approval date	16 December 2021 by FSC Director General
Publication date	11 January 2022
Status	Final
Effective date	As of the approval date (16 December 2021)
Period of validity	Until withdrawn or replaced by other normative documents..
Background	Some 40 Forest Stewardship Standards (FSS) have been launched since the International Generic Indicators (IGI) were published in 2015. These standards have been developed and transferred according to the procedure FSC-PRO-60-006, aimed for <i>“the development of new NFSS and for transferring existing NFSS to the P&C V5-1”</i>. Earliest of these FSS have become due for the scheduled 5-year revision cycle. At the same time, the procedure FSC-PRO-60-006 is getting outdated, as it does not address the revision of the FSS which are already based on the P&C V5-x. It is also lacking the rules for bringing in new or revised IGIs to FSS. Consequently, a need has arisen to expand the scope of FSC-PRO-60-006 to meet these current needs and clarify which elements in the procedure are still relevant and applicable for FSS revision processes. At the same time, the review and revision for <i>60-series normative documents</i>¹ is going on. It is envisaged that this Advice Note will be withdrawn once the revision of the 60-series normative documents is completed.
Advice	For the revision of Forest Stewardship Standards (FSS) which are already based on V5-x of the P&C FSC-PRO-60-006 V2-0 shall be applied as follows: 1. The following sections of FSC-PRO-60-006 V2-0 shall be applied, while the ones not listed can be ignored: a) E. Terms and Definitions b) 1. General requirements c) 2. Using the IGIs

¹ 60-series normative documents mentioned above and under revision process are –
FSC-STD-60-006 V1-2 Process requirements for the development and maintenance of National Forest Stewardship Standards,
FSC-STD-60-002 V1-0 Structure and Content of National Forest Stewardship Standards,
FSC-PRO-60-006 V2-0 Development and Transfer of National Forest Stewardship Standards to the FSC Principles and Criteria Version 5-1
FSC-PRO-60-007 V1-2 Structure, Content and Development of Interim National Standards

	d) 5. Addressing Scale, Intensity and Risk (SIR) 2. SDGs shall use as a starting point: a) All indicators in their valid FSS, and b) All new and revised International Generic Indicators which were not addressed in their valid FSS. 3. SDGs shall use the indicators of their approved FSS as the starting point of the revision as follows: a) Adopting an existing indicator from the FSS; does not require justification b) Adapting or dropping an existing indicator from the FSS; requires justification c) Adding new indicators; requires justification. 4. SDGs shall use the new and revised International Generic Indicators as the starting point of the revision as follows: a) Adopting an IGI; does not require justification b) Adapting or dropping an IGI; requires justification. 5. SDGs shall use the transfer matrix and submit it together with the respective drafts to PSU.
--	--

ADV-STD-60-006_05 Extension of the Validity of Forest Stewardship Standards

Normative reference	Section 12 and Clause 15.1 of <u><FSC-STD-60-006 V1-2 Process requirements for the development and maintenance of National Forest Stewardship Standards></u> Clause 1.10 of <u><FSC-PRO-60-006 V2-0 Development and Transfer of National Forest Stewardship Standards to the FSC Principles and Criteria Version 5-1></u> Sections 9 and 10 of <u><FSC-PRO-60-007 V1-2 Structure, Content and Development of Interim National Standards></u>
Scope	This Advice Note applies to or is relevant for organizations applying for or holding FSC Forest Management certification, their certification bodies, and all the parties involved in the development or revision of Forest Stewardship Standards.
Approval date	27 May 2025 by FSC Director General
Publication date	25 June 2025
Status	Final
Effective date	25 June 2025
Transition end date	Not applicable
Period of validity	Until replaced by other normative documents.
Background	As per <u><FSC-STD-60-006 V1-2 Process requirements for the development and maintenance of National Forest Stewardship Standards></u>, <u><FSC-PRO-60-006 V2-0 Development and Transfer of National Forest Stewardship Standards to the FSC Principles and Criteria Version 5-1></u>, and <u><FSC-PRO-60-007 V1-2 Structure, Content and Development of Interim National Standards></u>, an approved FSC Forest Stewardship Standard (FSS) remains valid for a period of five (5) years from the effective date. As on 1 April 2025, there are 88 FSS globally developed based on version 5 of the FSC Principles and Criteria (P&C V5). Out of these FSS, 24 have completed their validity period by April 2025, and 44 will complete their validity period by December 2026. For any forthcoming FSS revision, a different type of validity statement will be used, which does not confine the validity to 5 years only. Regular or extraordinary revisions of FSS based on P&C V5 are being kept to a minimum given current priorities at FSC Secretariat between 2025 and 2027: - Completion of P&C V4-to-V5 FSS transfers, and - Development of first generation of FSC Risk Assessments based on the revised Risk Assessment Framework (<u>FSC-PRO-60-006b</u>). In addition, the revision of normative requirements regulating the development and maintenance of FSS (which will be specified under FSC-PRO-60-006 and FSC-PRO-60-006a) is ongoing and only expected to be finalized by January 2027, with the publication of both procedures.

	The FSC Principles and Criteria V5 is also undergoing revision and is planned to be completed by October 2028. Once the revision is completed, the FSS based on V5 of FSC P&C will be required to transfer to FSC P&C V6. Therefore, due to current priorities at the FSC Secretariat and the overall changes in the FSC Normative framework both at International and Country level there is a need to extend the validity of FSS based on P&C V5.
Advice	1. Forest Stewardship Standards based on P&C V5 with a stated validity period of five (5) years shall remain in effect beyond this period until revised, replaced or withdrawn.

PART 3 FSC ADVICES ON FSC-PRO-60-006b

ADV-PRO-60-006b_01 Assessment of conversion of natural forest and transformation of plantations to agricultural use	
Normative reference	Clauses 16.3, 16.4 and Table 3 of < <u>FSC-PRO-60-006b V2-0 Risk Assessment Framework</u> >
Scope	This Advice Note applies to or is relevant for organizations sourcing FSC Controlled Wood using < <u>FSC-STD-40-005 V3-1 Requirements for Sourcing FSC Controlled Wood</u> > and all the parties involved in the development or revision of FSC Risk Assessments. It also applies to organizations implementing the FSC Regulatory Modules ² as a tool to demonstrate conformance with the 'Regulation (EU) 2023/1115 on deforestation-free products' (EUDR).
Approval date	14 October 2025 by FSC Director General
Publication date	31 October 2025
Status	Final
Effective date	This Advice Note shall have two effective dates: a) 01 November 2025: For all the parties involved in the development or revision of FSC Risk Assessments in accordance with < <u>FSC-PRO-60-006b V2-0 Risk Assessment Framework</u> >. b) 01 January 2026: For organizations developing Extended Company Risk Assessments (ECRA) in accordance with < <u>FSC-STD-40-005 V3-1 Requirements for Sourcing FSC Controlled Wood</u> > or in accordance with the <u>FSC Regulatory Modules</u> .
Transition end date	Not applicable
Period of validity	Until withdrawn or replaced by other normative documents.
Background	One of the key changes introduced with the revised <<u>FSC-PRO-60-006b V2-0 Risk Assessment Framework</u>> is the alignment of FSC normative requirements with the <<u>FSC-POL-01-007 Policy to Address Conversion</u>> and the EUDR. In this context, 5 new risk assessment indicators were included in this framework. Among those, Indicator 55 focuses on the assessment of conversion of natural forests and transformation of plantations to agricultural use after 31 December 2020. Further information can be found in <<u>FSC-GUI-40-005 Crosswalk of Indicators between Risk Assessment Framework V1-0 and V2-0</u>>. Considering the provisions of <<u>FSC-POL-01-007 Policy to Address Conversion</u>> and the definition of 'deforestation-free' in Article 2.13 of the EUDR, Clauses 16.3 and 16.4 were included in <<u>FSC-PRO-60-006b V2-0 Risk Assessment Framework</u>> for the assessment of Indicator 55. These clauses were based on the precautionary approach, which resulted in a default 'non-negligible' risk designation for this indicator. Only in the case of a risk assessment conducted via a major type of process, it allowed a chamber-

² The FSC Regulatory Modules refers to <FSC-STD-60-004r_Regulatory Module - International Generic Indicators>, <FSC-STD-40-004r_Regulatory Module - Chain of Custody Certification>, <FSC-STD-50-001r_Regulatory Module - Trademark>, <FSC-STD-40-006r_Regulatory Module - Project Certification>, <FSC-STD-30-005r_Regulatory Module - Forest Management Groups>, <FSC-STD-20-011r_Regulatory Module - Chain of Custody Evaluations>, <FSC-STD-20-001r_Regulatory Module - General Requirements for Certification Bodies>, <FSC-STD-30-010r_Regulatory Module - Controlled Forest Management>, and <FSC-STD-20-007r_Regulatory Module – Forest Management Evaluations>.

	balanced Working Group to designate an area as 'negligible risk', provided they are able to demonstrate via data that relevant conversion or transformation activities have not taken place in the area under assessment since 31 December 2020. In May 2025, the <u>EU benchmarking</u> was released by the European Commission (EC) in line with Article 29 of the EUDR. This benchmarking assesses the deforestation risk at the level of a country, or parts thereof, based on a range of criteria that reflects quantitative, objective and internationally recognised data. The benchmarking system is based on a three-tier system for classification of countries as low, standard or high risk. 'Low risk' refers to countries, or parts thereof, where there is sufficient assurance that production of commodities/products is deforestation-free, or in case issues are found, these are exceptional. Therefore, taking into consideration the recently published EU benchmarking, FSC has decided to align the methodology for the assessment of Indicator 55 with the results of the EU benchmarking.						
Advice	1. Clauses 16.3 and 16.4 of <<u>FSC-PRO-60-006b V2-0 Risk Assessment Framework</u>> on the application of the precautionary approach for the assessment of Indicator 55 shall be considered withdrawn. 2. The following revised definitions of and notes under the 'non-negligible risk thresholds' for Indicator 55 in Table 3 of <<u>FSC-PRO-60-006b V2-0 Risk Assessment Framework</u>> shall apply: <table><tr><th>No.</th><th>Indicator</th><th>Non-negligible risk thresholds</th></tr><tr><td>55</td><td><i>There is no conversion of natural forest and no transformation of plantations to agricultural use since 31 December 2020.</i></td><td> 1. The European Commission's official assessment³ based on Article 29 of EU Regulation 2023/1115 does not classify the country under assessment, or parts thereof, as low risk. 2. More recent/additional data available indicates that the low risk classification for the country under assessment, or parts thereof, by the European Commission's official assessment based on Article 29 of EU Regulation 2023/1115 should be revised. 3. In the absence of an official assessment by the European Commission based on EU Regulation 2023/1115, the following threshold applies: Evidence indicates that conversion of natural forest and/or transformation of plantations to agricultural use has occurred after 31 December 2020. NOTE: Various methods may be used to assess this risk threshold and proof that the requirements under this indicator are met. For example: enforcement of applicable legislation, spatial analysis, etc. </td></tr></table>	No.	Indicator	Non-negligible risk thresholds	55	<i>There is no conversion of natural forest and no transformation of plantations to agricultural use since 31 December 2020.</i>	1. The European Commission's official assessment³ based on Article 29 of EU Regulation 2023/1115 does not classify the country under assessment, or parts thereof, as low risk. 2. More recent/additional data available indicates that the low risk classification for the country under assessment, or parts thereof, by the European Commission's official assessment based on Article 29 of EU Regulation 2023/1115 should be revised. 3. In the absence of an official assessment by the European Commission based on EU Regulation 2023/1115, the following threshold applies: Evidence indicates that conversion of natural forest and/or transformation of plantations to agricultural use has occurred after 31 December 2020. NOTE: Various methods may be used to assess this risk threshold and proof that the requirements under this indicator are met. For example: enforcement of applicable legislation, spatial analysis, etc.
No.	Indicator	Non-negligible risk thresholds					
55	<i>There is no conversion of natural forest and no transformation of plantations to agricultural use since 31 December 2020.</i>	1. The European Commission's official assessment³ based on Article 29 of EU Regulation 2023/1115 does not classify the country under assessment, or parts thereof, as low risk. 2. More recent/additional data available indicates that the low risk classification for the country under assessment, or parts thereof, by the European Commission's official assessment based on Article 29 of EU Regulation 2023/1115 should be revised. 3. In the absence of an official assessment by the European Commission based on EU Regulation 2023/1115, the following threshold applies: Evidence indicates that conversion of natural forest and/or transformation of plantations to agricultural use has occurred after 31 December 2020. NOTE: Various methods may be used to assess this risk threshold and proof that the requirements under this indicator are met. For example: enforcement of applicable legislation, spatial analysis, etc.
